

Our Swiss made hygienic automatic doors use touchless buttons and sensors to reduce the spread of viruses and bacteria. Help minimise the impact of Coronavirus (COVID-19) and arrange an install today. We specialise in businesses, hospitals, schools, medical centres & more.

## HYGIENIC AUTOMATIC DOORS – REDUCE SPREAD OF CORONAVIRUS

Hygiene and touchless technology have fast become a key topic of discussion amongst Australians in recent times due to the rapid spread of Coronavirus (COVID-19). Individuals are now more conscious of the importance of adequate hygiene measures, including the hygiene protocols and practices put in place at the businesses and facilities they visit.

To meet the growing concern and risk of COVID-19, Perth businesses are moving to install automated doors at their premises to provide no contact access for employees and customers. Go Doors high quality touchless automatic doors (with options of sliding and swing) use sensors to detect people approaching the entry, opening and closing for the patron automatically as they enter the premises.

TOUCHLESS ENTRY SIGNIFICANTLY REDUCES THE SPREAD OF GERMS, CONTAMINATES & CORONAVIRUS

GO DOORS CAN INSTALL OR RETROFIT A NEW COMMERCIAL GRADE GD TOUCHLESS SENSOR TO EXISTING ENTRIES & SWITCHES

MAKE THE SWITCH TO HYGIENIC AUTOMATIC DOORS WITH GO DOORS AUTOMATED ACCESS SOLUTIONS

## Where can you install 'No Contact Automatic Doors'?

- Hospitals, operating theatres, laboratories, patient rooms, medical facilities & general practitioners
- Residential care homes for people with limited mobility
- Food processing facilities & restaurants
- Schools and universities to prevent contagion between students
- Accommodation & hospitality providers such as hotels, pubs & backpackers
- Aged care shared facilities, offices & aged care homes plus many more!

## BENEFITS OF TOUCHLESS AUTOMATIC DOORS

This touchless entry significantly reduces the opportunity for germs, contaminants and coronavirus to spread via shared surfaces such as door handles, buttons, keypads and intercoms.

### IMPROVED HYGIENE

Stop the spread of coronavirus and unwanted contaminants, viruses and bacteria with hygienic, touchless automatic doors. As physical contact from the hands is not required to pass through, contagion risks are greatly reduced with viruses and bacteria unable to pass through touch. Fitting your new automatic door with an airtight seal also creates a barrier to debris, odours and pollution.

### ENERGY SAVING

Save on heating and ventilation costs while creating a hygienic workplace with automatic sliding and swing doors. By utilising the Swiss made, highly energy efficient range of Go Doors Automatic Doors, the energy savings in a commercial setting can provide a payback on investment of around a year or less, making it a very worthwhile investment. Automated doors help maintain a moderate temperature at all times, ensuring doors open and close rapidly when activated.

### EASY ACCESS

Automatic door sensors allow for touchless entry and exit by employees and customers, making the transition between rooms or entry points a seamless experience. The adjustable GD Touchless Sensor allows improved hygiene and accessibility with automatic doors opening at the wave of a hand or arm, requiring no touch.

### REDUCED NOISE POLLUTION

With routine maintenance and servicing, your new hygienic automated door solution will reduce that frustrating and annoying creaking sound while opening and closing doors. This provides a more relaxed and comfortable experience for your clients.

### BOOST PUBLIC PERCEPTION

Greeting visitors with automated and touchless doors at your establishment will make an impression on visitors that your business cares about their hygiene and comfort. Improve the experience for visitors today by revisiting your premises and taking the necessary steps to reduce the spread of coronavirus, bacteria and germs.

---

**While high-risk buildings generally already have automated doors and rigorous hygiene practices, the shift to automatic no contact doors is becoming a must have across most industries.**

---

### ADDED SECURITY

Automatic doors can also assist in the management of security. Go Doors automatic doors have the option of automated electromechanical locks which can be programmed to lock and unlock at specific times of the day, or only be unlocked by those with appropriate access privileges. Having an automatic door removes the worry of forgetting to lock or shut a door behind you, giving you the peace of mind that your door will always be secure.

### AUTOMATIC DOOR STYLES

Go Doors can provide a touchless automated door solution for almost any application, whether it be a door between the kitchen and dining hall, or the entrance to a medical facility. With both new and retrofitted swing and sliding door options, we'll find the most cost-effective and hygienic solution to help reduce the chance of Coronavirus, germs and bacteria spreading.

Make hygiene your top priority with touchless automatic doors from GO DOORS
